Edward Sanders

Creative and Collaborative Software Builder

Professional Summary

I am a collaborative and passionate full-stack developer with over 7 years of experience solving difficult and complex problems for customers and businesses. I thrive in cross-functional, product-oriented environments where I can work with other disciplines and stakeholders to quickly bring products to market. I have a proven track record of guiding teams to successful outcomes across diverse industries such as retail, medical billing, and learning management, employing a wide array of languages (TypeScript/JavaScript, Kotlin, C#), frameworks (React, Spring, .NET), persistence and streaming technologies (PostgreSQL, Redis, Kafka), and cloud technologies (Azure, Tanzu).

Work History

Senior Software Engineer

🏛 *Dick's Sporting Goods*   📅 *January 2023 - today*

> Develop products to solve business problems with a wide variety of technologies.
> Work with product managers, product designers, and business stakeholders to clarify business requirements and craft solutions.
> Review pull requests and mentor junior developers.
> Utilize CI/CD best practices and cloud technologies to build scalable and maintainable cloud native applications.
> Thoroughly test and document code and processes.
> Guide code standards by researching and introducing patterns and practices.
> Lead Front-end Excellence group and Stores Design System initiatives.
> Recognized as the Store Technology All-Star for Q4 FY2023 for my contributions to Front-end Excellence and Stores Design System work.

Software Engineer II

🏛 *Dick's Sporting Goods*   📅 *September 2020 - January 2023*

> Built and scaled an in-house appointment scheduling and management product used by nearly 300 stores and hundreds of thousands of customers.
> Digitized paper forms, improving store labor performance.
> Gave a well-received presentation on Tailwind CSS at a company-wide tech meetup.
> Guided product design decision-making when product team lacked design presence.

Software Engineer

🏛 *Tobii Dynavox*   📅 *August 2018 - September 2020*

> Improved development processes by encouraging and implementing best practices in project management, change management, documentation, and TDD.
> Built an automated order processor that saved one team forty hours of work every week by leveraging automated PDF generation and synchronizing data across multiple systems.
> Created an application that helped internal users send personalized text messages to customers using the Twilio and Microsoft Graph APIs.
> Designed and implemented the first version of an in-house customer management system.
